About AUFF NOVA

The AUFF NOVA initiative aims to stimulate courageous and innovative research projects of high quality and especially projects that may have difficulties obtaining funding elsewhere. The project must be pioneering in its field and show clear potential for scientific breakthroughs. The hypothesis or problem behind the project may require development of new methods and it may challenge existing paradigms.

In the evaluation of applications for AUFF NOVA, the scientific potential and the originality of the project will be given higher weight than the CV of the applicant. If relevant, multi-disciplinary elements and synergies within the proposed research team should be clearly identified.

As the foundation wishes to benefit as many different researchers as possible, a 1-year waiting period for rejected applicants applies. This applies forward; meaning that if an application is rejected in 2023 it is not possible to apply in 2024. Furthermore, grant holders cannot apply during the period in which they already have a NOVA grant from the fund.

In 2024, the frame for AUFF NOVA is DKK 48,000,000 in total and this includes overhead.

Two types of grants are available in the AUFF NOVA scheme:

- 1) Small projects (grants up to DKK 600,000)
- 2) Large projects (grants up to DKK 2,500,000)

Priority is given to small projects. Project duration is typically 1-2 years for the small projects and 3-4 years for the large projects.

Starting in 2024 all grants will receive a fixed rate of 20% in overhead on top of the actual project costs. Please include the overhead costs in the total applied amount as well as in the budget.

Application process

Who can apply?

AUFF NOVA is available for researchers with a permanent position at Aarhus University. Applicants must be employed at Aarhus University during the whole project period, and the research must be carried out at Aarhus University. Tenure track assistant professors are considered permanent staff in this regard. Research leaders in fixed, part-time employment at AU, with concurrent clinical employment at AUH, can also apply.

How to apply

The application must be submitted via the electronic application system <https://auff.grant.nu/profile/#/login>. Once you have registered, you can change/edit your application until submission. The applications system is available in all browsers and on tablets. The applications form is available one month before deadline.

Application requirements and content

Basic information about the applicant is to be filled in via the electronic application system. There are no templates for the appendices, however, present guidelines must be followed and the application must be written in English. The following appendices are required and must be uploaded in the electronic application system. **All appendices must be uploaded as PDF files.**

- **Appendix A: Synopsis of the project**

The synopsis should include background of the project, research questions and hypotheses. The synopsis should focus on the project in relation to current beliefs and contain information on sources, data and methods. Moreover, collaborators in the project, the project's scientific importance and broader impact must be included. (Maximum of 4800 characters incl. spaces; 2 pages, 1.5 line spacing). One extra page with publication references to the synopsis may be added if needed.

- **Appendix B: Project plan and expected objectives**

Including the project's timeline and work plan. **Milestones and deliveries should include at least one large national or international research grant application.** Moreover, the plan should include the project's future development in terms of content, financing and organisation together with the planned contribution to talent development. (Maximum of 2400 characters incl. spaces; 1 page, 1.5 line spacing). A separate Gantt chart (or similar) can be included in one additional page.

- **Appendix C: Presentation of the applicant**

CV for the applicant including basic information about education and employment history, skills, achievements and key publications (maximum of 2400 characters incl. spaces; 1 page, 1.5 line spacing)

- **Appendix D: Presentation of the research group**

Description of the research group and the competences relevant to the project description (Maximum of 2400 characters incl. spaces; 1 page, 1.5 line spacing)

- **Appendix E: Budget**

Specified budget (principal items) for the amount applied from AUFF (maximum 1 page). Project duration is 1-2 years for small projects or 3-4 years for the large projects. Small projects with a maximum of DKK 600,000 in total and large projects up to DKK 2,500,000, in total.

It is possible to apply for costs related to project implementation, including salary for staff (typically PhDs or postdoctoral fellows). Please note, that if the budget contains costs related to wages, these must be based on Danish collective agreements and include pension, ATP and holiday payment.

It is not possible to apply for salary to the PI/applicant, since Buy-out/frikøb is not granted in this scheme.

Starting in 2024 all grants will receive a fixed rate of 20% in overhead on top of the actual project costs. This implies that the total amount for small projects maximum can amount to 720,000 DKK and 3,000,000 DKK for large projects.

Please type in the sum applied for in the section named "Total amount applied from AUFF" in the electronic submission system. **Please include the overhead costs here as well.**

- **Appendix F: Recommendation letter**

Academic recommendation by head of department or similar MUST be enclosed (applicant cannot draw up the academic recommendation him- or herself).

Additional information

Project duration is typically 1-2 years for small projects or 3-4 years for large projects.

Main applicant is the designated project manager, but the project will typically include a research group.

AUFF does not grant any funding for projects which already have funding. If the project is under review elsewhere, please indicate where and for what amount.

It is a prerequisite that the research in the project is carried out at Aarhus University.

Applicants can be contacted for further information or invited for an interview.

Timeline

Call: July 2024

Deadline for applications: 10 September 2024 at 12:00 (noon)

Evaluation period: September – November 2024

Applicants will receive answers: December 2024

Expected project start: 2025

Evaluation and selection process

Each eligible proposal will be evaluated by the review committee appointed by Aarhus University Research Foundation Board. The review committee consists of five professors, one AU-designated from each faculty. The review committee will make recommendations for funding to the Aarhus University Research Foundation.

Review committee

Professor Michael Møller Hansen, Faculty of Natural Sciences

Professor Dorthe Staunæs, Faculty of Arts

Professor Helle Prætorius Øhrwald, Faculty of Health

Professor Jens Blom-Hansen, School of Business and Social Sciences

Professor Lotte Bach Larsen, Faculty of Technical Sciences

Evaluation criteria

The applications will be evaluated based on the following criteria:

Project: 60%

- Originality (including high risk / high gain and ambition)
- Transparency (correlation between problem and method – and theoretical apparatus)
- Feasibility

Impact: 20%

- Job creation, grand challenges, creative communication
- Planned project deliverables
- Large scale applications (national/international funding sources)

Main applicant and research group: 20%

- CV and international publications and impact
